Explanation of Figures:

MyoMAX = MyoMAX genes present - either 0, 1, 2 or not present if ram not tested

DamLamb = Dam's lambing history

BR/RR Birth and Rearing Rank

Indexes – all in cents:

NZMW = NZ Maternal Worth - Standard NZ Index for Maternal Sheep = DPR + DPS + DPG + DPA. Doesn't include DPW, DPM, DPF or DPD

DPO = Dual Purpose Overall Index = NZMW + DPM + DPF + DPD + DPW (DPX or DPH not included)

DPF = Dual Purpose FEC (Resistance to Internal Parasites)

FECSTAR: 5 star top 10% for DPF, 4 star top 20% for DPF, 3 star top 30% for DPF, 2 star top 40% for DPF, 1 star top 50% for DPF

DPR = Dual Purpose Reproduction

DPH = Dual Purpose Hogget Lambing

DPS = Dual Purpose Survival

DPG = Dual Purpose Growth

DPA = Dual Purpose Adult Size (the bigger the adult sheep the higher the maintenance feeding cost, therefore normally negative)

DPM = Dual Purpose Meat (meat yield over whole carcass)

DPW = Dual Purpose Wool

DPD = Dual Purpose Dags (positive less dags, negative more dags)

DPX = Dual Purpose Facial Eczema

Methane = Methane Index with Carbon at \$50/T
