## REBATE COMMISSION

A purchasing rebate of $6 \%$ will then be paid to non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.

## DISCLAIMER

EBV's have been calculated by TransTasman Angus Cattle Evaluation from the raw data supplied by Angus Breeders Society members. Angus Breeders Society of New Zealand Inc. does not oversee or audit the collection of this data. No responsibility is accepted by the Angus Cattle Breeders Society of New Zealand Inc. or the vendor for the use or interpretation of information on the animals included in this catalogue.

## FOREWORD

In 2023 we are excited to present 17 quiet, moderate and meaty Angus bulls at our third annual Angus 2yr bull sale. Any of these bulls we would use in our commercial herd on our steep hill country. Features of this sale are the first sons of Pure NZ Pinebank P80; a top bull S101 from a quality Rangatira cow and Turiroa Maverick; and the five sons of our Rising 11 Puke-Nui bull 12/333 or "Big Boy" which are perfect for heifer mating. All bulls have been semen tested and physically checked by Taihape Vets.

Currently the herd is 90 registered cows, with $40 \%$ of these being pure New Zealand genetics. The base of the Okaka Stud has been formed with the purchase of females from the Waitawheta Stud of Alistair and Pat Sharpe, the Meadowslea Stud of David Giddings, the Red Oak Stud of Richard Orr, and cows from many dispersal sales. Although we have some bigger cows, we find the moderate cows are coping with the job of tidying up the hills the best. Ultrasound and DNA technology, including i50k and sire trace, are also used to help select stock and provide info on unseen qualities.

The property, at Papanui Junction, Taihape is a total of 565ha (540ha effective) and consists of 350ha steep hill country, 80ha easy hill country and about 110ha cultivatable country - a nice breeding balance. Other stock on Okaka are a herd of 50 commercial cows, and 2500 Romney ewes (including two-tooths) and their replacements.

Bulls will be sold via the Yourbid online helmsmen auction system, given its success in the past. Buyers enjoyed having the time and space to make a good decision on which bull was appropriate for them. Thankyou to the Giddings family who created this efficient system for selling bulls. The sale will climax on Thursday 15th June from 1pm at Papanui Junction Hall. Buyers can come on the day, see the bulls, and bid at the sale site, or if unable to make it, can come and see the bulls before the sale day (open day 6th June) and then bid on-line from home on the day.

Thank you to all the people that have contributed to Okaka Angus and the line of bulls presented on the 15th June 2023.

## PAUL \& SUSANNAH REVELL

- Okaka Angus is on Facebook or phone 063887519.
- You are welcome to come and view bulls at any time up to the sale.
- There will also be videos of the bulls on line at yourbid.co.nz.

## OKAKA

ANGUS

## ON-LINE bidding

opens on
THURSDAY 8TH JUNE - 7PM
www.yourbid.co.nz

## SALE FORMAT

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online.
The sale will be hosted on the yourbid platform and accessed through the website www.yourbid.co.nz.

Prior to the sale, all lots will be filmed and available for viewing on the Yourbid website.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Yourbid website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid they place, whether they do so at home on their computer, or through their smart phone, or manually while in attendance.

Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the auctioneers. All live bids and all lots will be visible at all times, both online and on a big screen onfarm.

Online registration is available NOW and we encourage everyone to visit our website www.yourbid.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

An online video of each bull in the catalogue will be available for viewing by Friday 2nd June (if not earlier) and right through to sale day. These videos will be released on our website and on the "Okaka Angus" facebook page once they are available.

Online bidding will be open from Thursday 8th June - 7pm until the conclusion of the sale.

On Sale Day, June 15th, the on-farm registration and bidding will open at 11am.

Updates on state of sale and likely finish will be made through the comments section of the web-site chat room.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot.

Bids will be displayed on a computer or smart phone screen in the following colours: A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot.

On-farm attendees will be able to view on a big screen on site.
Bids will be displayed on screen in the following colours

## EXAMPLE:

\$2500 Displayed in Red denotes the Vendor's reserve and indicates there has been no bid
\$3000 Displayed in Blue means an active bid has been received
\$3500 Orange highlight indicates a new Bid has been received within the last 2 minutes on this lot
$\$ 3500$ The holder of the leading bid will have the lot number highlighted in green on their computer or their smart phone

The sale will run until 1.30pm, 15th June 2022. After this time the sale will conclude once there has been a period of at least 2 minutes without a bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes.
This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.
Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.
All updates will be posted on the website, as will an up-to-date version of this document.

## REBATE PURCHASING COMMISSION

Carrfields is the booking company and will be responsible for booking bull purchases.

1. $6 \%$ rebate commission paid to the nominated buying company, provided the vendor is advised of the purchaser's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.
2. $3 \%$ rebate commission paid to the nominated buying company when the vendor has NOT been advised of the purchaser's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.

# Taihape \& Ruapehu VETERINARY - Services 

## Kotare Street,

Taihape,
Phone (06) 3880863 Fax (06) 3880657
Email: taihapevets@xtra.co.nz
The bulls presented for sale by Paul \& Susanna Revell, Okaka Stud, have all passed the following:

- Scrotal palpation
- Penis examination
- Mating ability
- $\quad$ Semen morphology \& motility

These bulls were great to work with during the above testing, a testament to their good temperament.

All bulls are BVD antigen negative. They are also vaccinated against BVD and Leptospirosis and will have received their annual vaccine booster shots prior to the sale.

Anthony Oswald BVSc

## ANGUS NZ EBV's Explained

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

## A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND ANGUS SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

Which New Zealand Angus Selection Index should you use?

1. Identify the Angus New Zealand selection index of most relevance to you.
2. Rank animals using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

## TRANTASMAN ANGUS CATTLE EVALUATION

A TACE Guide to Interpreting EBVs outlines how to assess and compare the genetic merit of animals. Please note that only EBVs from the same TACE analysis can be directly compared. The New Zealand Angus Association publishes the following TACE EBVs:
Calving Ease Direct (\%): Higher (or more positive) CEDir EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.
Calving Ease Daughters (\%): Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at two years of age.
Gestation Length (days): Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.
Birth Weight (kg): Bulls with lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

200, 400 \& $\mathbf{6 0 0}$ Day Weight EBVs (kg): Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to $200,400 \& 600$ days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).
Mature Cow Weight (kg): Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.
Milk (kg): Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

Scrotal Size (cm): Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.
Days to Calving (days): Bulls with lower (or more negative) DTC EBVs are expected to produce daughters
that are more fertile and have a shorter interval from bullin date to calving.

Carcase Weight (kg): Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcase weights.

Eye Muscle Area (sq. cm): Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm): Bulls with higher (or more positive) Rib \& Rump Fat EBVs are expected to produce fatter progeny, relative to carcase weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (\%): Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcases.
Intramuscular Fat (\%): Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).
Docility (\%): Bulls with higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

For more information on using and understanding TACE EBVs \& information, including the BREEDPLAN Guides, scan the QR code.

## SELECTION INDEXES

The New Zealand Angus Association currently reports three different selection indexes. These are the:

- Self Replacing Index
- AngusPure Index
- Heifer/Dairy Terminal Index

Each selection index is reported in units of net profitability per cow mated (\$), and relates to a commercial herd using Angus bulls. Each selection index is focused on efficient beef production, including maternal traits where appropriate. Scan the QR Code for more detail.

## ANcus

## ANGUSPURE PARTNER STUD

AngusPure NZ has teamed up with 88 Angus studs who share in our vision - to focus on the end consumer. This stud is proud to be named as one of them, and by using the finest genetics and implementing best management practice they can help you produce more premium quality Angus beef.

Only our AngusPure Partner studs display these devices in their sale catalogues. They indicate bulls endorsed by AngusPure NZ.

## A anguspure endorsed bulls

AngusPure NZ continues to endorse bulls for sale that are either at or above $+\$ 125$ for the AngusPure index (API) and at or above $\$ 115$ for the AngusPRO index (PRO). These indexes give commercial farmers confidence that by using these selection tools, bulls are most likely to leave progeny with superior carcase quality. At the same time they achieve desirable outcomes for self replacing herds, as the AngusPure \& AngusPRO indexes still reward cattle with strong maternal attributes like calving ease, scrotal and growth, along with carcase weight.

To qualify, bulls will be $=>+\mathbf{\$ 1 2 5}$ for AngusPure index $\mathbf{O R}=>$ +\$115 for AngusPRO index

## A+ EXTRA ANGUSPURE ENDORSEMENT FOR MARBLING

In addition to the ' $\mathbf{A}$ ', and to assist bull buyers who wish to select for more marbling AngusPure are rewarding those animals that are either at or above $+\$ 145$ for the AngusPure index and at or above $\$ 135$ for the AngusPRO index. In addition to this they must have an IMF EBV (for marbling) equal to or greater than +2 .2. These bulls will be awarded an ' $\mathbf{A}+$ ' endorsement. Marbling is one of the very highest eating quality attributes and is necessary in order to meet some of the highest premium requirements for the export program, AngusPure Special Reserve.

To qualify, bulls will be $=>+\mathbf{\$ 1 4 5}$ for AngusPure index $O R=>$ $+\mathbf{1 3 5}$ for AngusPRO index, and in addition all bulls must be => +2.2 for IMF EBV

AngusPure NZ recognises the need to lift the amount of marbling in our New Zealand cow genetics, in order to fill the requirements of consumers going forward. Marbling has two critical components; genetics and feeding. Feeding on a rising plane of nutrition is vital but without the genetics these attributes will not be able to express themselves.

May 2023 TransTasman Angus Cattle Evaluation

Big Boy is Rising 11 and has 5 bulls in this sale $(4,9,12,15,16)$. A fantastic temperament - a real character. $40 \%$ of the commercial cows kept here at Okaka (50 cow herd) come from him. He brings longevity and consistency. Ideal genetics for heifer mating or carrying on into a moderate cow herd.

NOTES: S 101 is phenotypically the type of bull Okaka Angus strives to produce. His dam, Rangatira 14-222 (6/6), comes from a strong moderate maternal line. She produced Lot 2 in last year's sale and has a great $R 1$ bull on the ground this year. S 101's sire Turiroa Maverick L945 has sired many stud bulls sold from Rangatira stud.

 - on sale day and the best service every day after that. That's why we offer to insure your bull 2 purchased at any FMG Premier Bull Sale for: 14 days free" from the fall of the hammer.Erend yourcover All bulls purchased at auction up to $\$ 50,000$ can be insured for $6.5 \%$ of the purchase price on a 12 -month policy. You can choose to extend your 14 days free cover on the Purchaser Instruction and Insurance Slip. For terms less than 12 months, different rates apply.

So talk to your FMG Rural Manager about FMG Premier Bull Sales Insurance.

* Subject to standard underwriting criteria. Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wording at fmg.co.nz/livestockpolicy

Advice \& Insurance

## FMG Premier Bull Sale Insurance

## What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of $\$ 50,000$ for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

## What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the "Extend your Premier Bull Insurance" option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at $6.5 \%$ of the purchase price. If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

## What are the benefits?

| $\qquad$ Infertility | Cover if your specified bull <br> has to be euthanised due to <br> permanent infertility caused <br> by certain accidents, disease, <br> or illness. |
| :--- | :--- |
| $\checkmark$ Theft or death | We cover your specified bull <br> for theft or death caused by <br> certain accidents, disease, <br> or illness (including while <br> in transit anywhere in |
|  | New Zealand). |
| $\sqrt{\text { Vet costs }}$ | We cover up to $\$ 500$ for <br> treatment of your specified <br> bull to prevent death. |

## What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.
